Either button the shirt or use the studs. You cannot use both. If you have a Euro Tie and a vest, it wont make any difference.

Do not attempt to open the jacket lapel button hole. You will ruin the tuxedo.

Flowers on lapels are held in place with a straight pin. It is best if the pin is inserted from the back of the lapel. The pin then goes thru the flower and back out to the back side of the lapel. Be sure to pull the tip back so only a small portion of the tip is exposed.

The flower looks better centered on the lapel rather than directly over the button hole.

The flower goes on the **left handed lapel.**

Pinning on Flower

1. Center the flower in the middle of **LEFT** handed lapel. Top of flower should be at top of lapel.
- 2 Hold flower and flip over lapel to the back.
3. From the back of the lapel insert pin through lapel and then the stem of flower and then back out to the back of the lapel.
4. Pull pin back so that only a slight portion of the tip is exposed.
5. For heavy flowers also put a pin through the body of the flower as well
